

DEVANATHAN T

Full Stack Developer | Python Developer | UI/UX Designer

Puducherry, India | +91 90034 39423 | devanathan0824@gmail.com

GitHub: github.com/DEVANATHAN-TG | LinkedIn: linkedin.com/in/devanathan-tg | Portfolio: devanathan-t-portfolio.vercel.app

PROFILE SUMMARY

Full Stack Developer with hands-on experience building cloud-hosted, full-stack applications in Python, React, and Next.js, including systems integrating machine learning pipelines for predictive functionality. Skilled in UI/UX design, having independently delivered client-facing websites from wireframe through interactive prototype to final visual design. Strong foundation in REST API design, database integration, and clean, maintainable code.

TECHNICAL SKILLS

Languages: Python, JavaScript

Frontend: React, Next.js, HTML5, CSS3

Backend & ORM: Supabase (PostgreSQL), Drizzle ORM, REST APIs

AI / ML: Decision Tree, Random Forest, ML Pipelines, Prompt Engineering

UI/UX Design: Figma, Framer, Wireframing, Prototyping, Design Systems

Tools & Practices: Git, GitHub, Vercel, Code Review, Clean Code Practices

WORK EXPERIENCE

UX/UI Designer Intern - Duhzine IT Solutions Pvt Ltd

May 2026 - Aug 2026

- Owned the end-to-end UI/UX process for multiple client web projects, from requirements gathering through wireframes, interactive prototypes, and final visual design, using Figma and Framer.
- Created a reusable design system adopted across client projects, cutting rework and standardizing handoff from design to development.
- Leveraged AI tools to produce client-requested promotional video content, expanding delivery capability beyond core design work; completed the internship with an A grade.

InPlant Trainee - Lenovo India Private Limited

September 2023

- Performed hardware quality testing and defect inspection on desktop systems across assembly batches, verifying compliance with product standards and improving inspection traceability.

PROJECTS

Eligibility-Based Government Scheme Recommendation System

Jan 2026 - Apr 2026

Python | Next.js | Supabase | Drizzle ORM | Decision Tree | Random Forest

- Architected and deployed a cloud-hosted, full-stack Python and Next.js application that automatically matches citizens to eligible government schemes, replacing a manual lookup process.
- Designed and implemented a system integration layer with Drizzle ORM and Supabase, ensuring reliable end-to-end data flow across the application.
- Trained and applied Random Forest and Decision Tree models to predict scheme eligibility across diverse citizen profiles, forming the application's core decision logic.

EDUCATION

M.Sc. Computer Science - Pondicherry University, Puducherry

2024 - 2026

CGPA: 8.5 / 10

Bachelor of Computer Application (BCA) - Saradha Gangadharan College

2021 - 2024

CGPA: 7.2 / 10

CERTIFICATIONS

- NPTEL - Machine Learning for Core Engineering Disciplines
- NPTEL - Data Analytics with Python
